# Basin Partnership Task Force draft recommendations

---

NOAA's [Columbia Basin Partnership Task Force](#) has developed draft recommendations for long term goals for Northwest salmon and fish populations. The group includes twenty individuals from industry and interest groups throughout the region, as well as state and tribal representatives. PNWA Executive Director Kristin Meira, Port of Cascade Locks Commissioner Jess Groves and Port of Portland Marine Environmental Director Marla Harrison represent port/navigation interests on the Task Force.

The Task Force has worked for over 18 months on [qualitative and quantitative goals for fish runs in the Basin, as well as a vision statement and guiding principles](#). Task Force members will be asked in October to indicate whether their group can support these goals.

Your input is needed. Please review the Task Force's draft materials, and touch base with [Kristin Meira](#) at PNWA to provide your feedback by August 20th.

NOAA is proposing a second phase for the Task Force, focused on activities in the Basin which may help move the region toward accomplishing the qualitative and quantitative goals. If you are interested in serving on the Task Force for this next phase of work, please contact [Kristin Meira](#).
