

# PNWA SUPPORTED CORPS PROJECTS – FY 2024/2025 AT A GLANCE

The Pacific Northwest Waterways Association (PNWA) is a regional, multi-industry association focusing in trade, navigation and economic development policy. We represent public and private sector interests in Washington, Oregon, and Idaho including ports, towboat companies, steamship operators, river and bar pilots, agricultural producers, forest products manufacturers, labor groups and others. "Additional capability" reflects additional, estimated capabilities from the Portland, Walla Walla, and Seattle Corps Districts which will be expressed for FY2025 above the Administration's budget. The capability level is the Corps estimate for the most that it could obligate efficiently for a project in the next fiscal year. Note: Our numbers align with the priorities supported by PNWA; The Corps may have additional capabilities for projects not listed.

**Deep Draft Navigation.** More than 60 million tons of cargo, worth more than \$78 billion, moves in international trade across the docks of Pacific Northwest ports. The Puget Sound and Columbia River gateways are some of the largest in the country for: containers; wheat, soy and corn exports; and automobile imports. PNWA supports continued investment in the development and maintenance of the federal navigation projects that support this important economic activity. Note: funding is for dredging, unless otherwise noted.

**PNWA Member Small/Emerging Harbors.** PNWA supports full funding for these critical projects. These ports are home to fishing fleets, marinas and significant commercial and recreational facilities, and they are critical to the economic survival of their communities. Many have small populations, and the ports provide employment for a large percentage of the local workforce. *Note: Funding is for dredging, unless otherwise noted.*
